

# INDUSTRIAL REVOLUTION PROJECT

Discussed in Class & Assigned on \_\_\_\_\_

Our classes will be working on a display of inventions from the U.S.'s Industrial Revolution. This project will count as a SUMMATIVE ASSESSMENT. Your job will be to research an invention from 1800-1899 that is created by a United States inventor and/or invented in the United States. The project includes your creation of a small-scale museum piece that is accompanied by a 5x7 museum card. Your card and your project must be of high quality, as the quality of your work is a component of the grade. It is our goal to create a museum of 19<sup>th</sup> Century inventions.
