Learn how to implement MWEE experiences in your classroom. This learner-centered framework focuses on investigations into local environmental issues and leads to informed action. MWEEs are composed of multiple components that include learning both outdoors and in the classroom, and are designed to increase the environmental literacy of all participants by actively engaging students in building knowledge and meaning through hands-on experiences. In these experiences, the core ideas and practices of multiple disciplines are applied to make sense of the relationships between the natural world and society. MWEEs help connect students with their local environment and equip them to make decisions and take actions that contribute to stronger, sustainable, and equitable communities.

This training is supported by the 2021-2022 Statewide System of Support and is made available at **NO COST**
