Facilitator/Mentor: Amanda Karaffa and Rebecca Gibboney

Participants will gain a basic understanding of Strategic Instruction Model (SIM), an integrated model of evidence-based practices to address many of the needs of diverse learners, primarily focused on adolescents backed by more than 40 years of research. The research shows that student success is built through SIM and use of the Content Enhancement Routines (CERs). The CERs provide support for cooperative thinking strategies, community building strategies, motivation strategies, and teaming strategies. Over the three days, participants will receive training in at least three of the Content Enhancement Routines, practice using them, and discuss what role they can play in their classroom and district. Implementation of at least one CER will take place in the classroom through a coaching model with the IU SIM CER Professional Developer Apprentice. Use of these routines will help to build student success as, by design, they include mastery learning, teacher modeling, corrective feedback, higher order reasoning and organizing conceptual knowledge, and executive skills.

DATES AND LOCATIONS:
OCTOBER 20, 2022 IN CANTON
DECEMBER 13, 2022 - WILLIAMSPORT
FEBRUARY 21, 2023 - CANTON
